Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "170" has been used to designate both a crimped portion of a fastener 17 in figure 2 and a wall portion of a turret 172 in figure 4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The disclosure is objected to because of the following informalities: It lacks the headings noted in MPEP 608.01(a). Also, "170" has been used to designate both a crimped portion of a fastener 17 on page 7, line 7, and a wall portion of a turret 172 on page 7, line 20.

Appropriate correction is required.

3. Claim 2 is objected to because of the following informalities: There are two identical copies of claim 2, one on page 3 of the amendment of 6/16/2006 and the other on page 4. Appropriate correction is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Garcia et al. 2003/0109068. The embodiment of figure 4 of Garcia discloses a fluid dispenser member 1 with a body 10, a fastening means 17, a gasket 18 and an ID unit 3 with the claimed gap immediately above and to the left of 3 in figure 4. Paragraph 30 further discloses that the unit 3 can also be located either in or on the side wall of 10 in lieu of the location buried in the gasket 18 as shown in figure 4. One of ordinary skill in the art would have either considered paragraph 30 as disclosing that the unit 3 could be placed within the claimed gap on the side wall of 10, or would have considered this location to be obvious in view of the disclosure in paragraph 30 that unit 3 could be located on the side wall of 10 and figure 4 clearly shows an available spot on the side wall of 10 immediately adjacent the shown location of 3 in figure 4 within the claimed gap that would provide a convenient space for unit 3 to be located within.
